

RDA tags in WYLD Records If you need some titles with RDA tags to view in Workflows and eLibrary, a title for each record type is provided below. Search in ALL Libraries, do not limit to any specific library. RDA tags were added to the Configuration files for the six most common record formats used in WYLD: 264 (which can display multiple times on a bibliographic record depending on the indicator value), 336, 337, 338, 344, 345, 346, 347. Labels for these tags are translated in the same way regardless of the record type.

264, indicator 0 = Production

264, indicator 1 = Publication

264, indicator 2 = Distribution

264, indicator 3 = Manufacture

264, indicator 4 = Copyright date

336 = Content type (shows as rdacontent in subfield 2 in Workflows)

337 = Media type (shows as rdamedia in subfield 2 in Workflows)

338 = Carrier (Format type) (shows as rdacarrier in subfield 2 in Workflows)

344 = Sound characteristics

345 = Projection characteristics of moving images

346 = Video characteristics

347 = Digital file characteristics

Note that RDA records will have the 333x tags, however not all record formats will have all of the other RDA tags. For instance, the 346 tag for video characteristics applies to the VM record format for DVDs.

MAP format: Wyoming : Baggs (first one on the hitlist) BLM, 2013 ISBN: 9781411335738

Displays tags: 264, indicator 1 (Publication); 264, indicator 2 (Distribution); 336 (Content type); 337 (Media type); 338 (Format type)

MARC (Print materials) format: Guts Author is: Doyle, Roddy. Publication date: 2014

ISBN: 9780670016433

Displays tags: 336 (Content type), 337 (Media type), 338 (Format type)

DVD Publication date: 2012 ISBN: 9781435982420

Displays tags: 336 (Content type); 337 (Media type); 338 (Format type)

To view the MARC21 description of the 264 tag, its different indicators and the subfields, go to:
<http://www.loc.gov/marc/bibliographic/bd264.html>

To view the MARC 21 descriptions of these 3xx tags and subfields, go to:
<http://www.loc.gov/marc/bibliographic/bd3xx.html>

You can also find these and other tags by doing a google search on an individual tag number, example:
marc21 264 field This kind of search will retrieve a listing of options from which you can select
MARC21 Format for Bibliographic Data: 264: Production...
